CARBON, ALTA., THURSDAY, AUGUST 1, 1946 Authorized as second class mail, Post Office Department, Ottawa.

Farmers To Take Strike Vote Monday Evening

A vote on a non-delivery strike by private ballot for all AFU members will be held in the Scout hall, Carbon on Monday, August 5th at 8 p.m. Think over the questions you are voting for and mark X in the yes or no column of your ballot.

Immediate establishment of a finding board to determine parity prices. Personnel of such board to consist of organized farmers, business, labor and government representatives.

2. Price level to be based on \$1.55 net to farmers for all wheat produced basis No. 1 Northern Fort William for the next five year period.

3. Satisfactory floor prices for livestock, poultry and dairy products.

4. Immediate removal of all increase in machinery prices since 1944 level.

5. Removal of both: recent 2 cent increase of gasoline and 3 cents federal war measure tax

6. I am definitely opposed to any proposed income tax levy on co-operative savings.

7. Farmers income tax laws to conform with brief presented to federal government by the Canadian Federation of Agriculture.

8. Complete abolishment of the Grain Exchange.

9. An equitable adjustment in the grossly unfair freight rates.

The above questions is what you are asked to vote on and they are printed on your ballot paper. If you are in favor of the above nine points you are asked if you are prepared to withhold your produce until satisfactory negotiations are completed.

Farmers, this is your chance to be able to get a fair deal so turn out one hundred percent and vote. If you are in favor of the above and not a member join now and give your support to this movement which is the future of all farmers and don't leave it to the few to do all the work.

The report of the district convention held at Crossfield July 25th will also be given.

Turn out now if you want better living conditions for your families in the future and join your local AFU in this drive to help all farmers.

C. Cave, Secretary.

NOTICE OF DISSOLUTION OF A CREDIT UNION

I hereby certify that an Instrument of Dissolution has this day been filed in my office on behalf of the Carbon and District Savings and Credit Union Limited, pursuant to the provision of Section 71 of The Credit Union Act, and the said Credit Union is dissolved.

Given under my hand and seal of office at Edmonton this 16th day of July, A.D. 1946.

E. TOWBRIDGE,
Registrar of Credit Unions

That Label

Today our weekly paper came. And in the corner of page one. A notice stuck there, clear and plain.

In effect a dun!

It said in language plain and flat

"Your Subscription has expired" Now, if we'd wanted to know that

We'd surely have required.

A little peeved we thought a bit Then, of a sudden, laughed, Because a hidden truth we'd hit These editors have quite a graft They poke around, careless and free.

Where things are done or there is a face

And gather news of you or me Then sell it back to us.

Editors don't make the news, That's made by you and me But when they want a suit or shoes,

Stick on a dun you're sure to see.

I'd send this in to pay for mine But then, I guess he'd holler, And he might be really short, this time So I'll send the guy a dollar.

—Exchange

The Hailed Out Crop

Every year a substantial number of farmers get their crops hailed out. Hail never brings about a crop disaster on a province wide scale. What are 50,000 acres or 100,000, when it comes to a provincial acreage seeded to wheat of seven or 8 millions?

So we never have a crop failure from hail. But what a disaster to the individual who sees his crop beaten into the earth!

Drouth damage comes gradually and it would appear that a farmer can insure himself from that source. But hail hits suddenly, dramatically and overwhelmingly. A man has a crop one minute and ten minutes later he has a tangled field.

Our sympathy goes doubly out to him.

OFF THE RECORD

Maybe all the delay in settling problems which has been troubling the foreign ministers of Great Britain and United States has been due to the representatives of Soviet Russia following only the policies of Stalin!

While we approve completely of the principles of freedom of speech, yet a lot of free speech is actually worth nothing!

While the shortage of coal next winter may be alarming under present conditions, yet we are told by Ottawa not to become unnecessarily excited about it. Apparently they want us to remain cool next winter.

Clean 'em Out

Norman Jaques, social credit member of parliament for Wetaskiwin told the House of Commons that the National Film Board and the Canadian Broadcasting Corporation have for years been the means of spreading Communism. He asserted that much of the Russian spy trouble was the outgrowth of this insidious communistic propaganda.

Mr. Jaques can expect a torrent of vitriolic abuse to descend upon his head as the result of such statements but there is a great deal of truth in them. The CBC in particular seems to have had quite a number of parlor pinks in its headquarters' staff in the east. They have industrially and astutely publicized communism.

Every individual in a democracy is entitled to his opinion and to the free expression thereof. But a great government institution such as the CBC should be exceedingly careful when it comes to permitting the development of political and economic cults among its employees.

Food Price Comparison

The following chart, which was prepared by and printed in the Winnipeg Tribune, shows the fluctuations of food prices in 1918 and of 1945 and 1946.

It may be noted that prices for July 1945 and July 1946, as given here may be authorized price ceilings or below. Merchants can sell at or below price ceilings.

	1918	1945	1946
Milk	12	10	12½
Smoked ham	65	41	47
Evap. milk	13	10	10
Straw, jam	100	75	80
Lard	35	17	20
Flour 7lbs	50	22	24
Syrup 2 lbs	26	21	26
Eggs A	46	39	55
Sugar lb	11	9	9
Raisins lb.	23	16	19
Bacon lb	48	52	57
Butter	50	37	42

Democracy does not depend on whom you elect to rule but on how you elect to live.

LITTLE ITEMS OF LOCAL INTEREST

Born—to Mr. and Mrs. Gus Gieck, a son, Saturday, July 27.

Mr. and Mrs. W. Robertson Dave Robertson and son Warren of Kimberley, B.C. and Mr. and Mrs. Jas. Robertson were visitors at the home of Mr. and Mrs. W. Milligan.

Norma Cooper, Ioane Coates and Lorraine Milligan are attending the CGIT camp at Millerville.

Sgt. R. McMann left on Thursday for the Yukon after spending a couple of weeks with his family in Carbon.

Carbon bal team defeated Irricana 13-7 in a league game played at Irricana Sunday.

Mrs. Hugh Brown and Shirley and Rev. R. R. Hinchey left on Monday by car for Vancouver.

Mrs. John Hunt of Vanderhoff, B.C. is visiting with her son, Harry, whom she has not seen for 18 years.

Recent moves about town Mr. and Mrs. Gordon Hunt are moving into the house re-

cently occupied by Mr. and Mrs. Wilson and family who have moved to Drumheller. Mr. and Mrs. Wilf White are moving into the Anglican church house.

The I.O.D.E. will sell hot dogs at the Scout hall THIS Saturday.

No Increase In Gas Price

No increase in the retail price of gasoline in Canada is expected as a result of recent increases in the price of crude oil in the United States.

Prices Board officials said that gasoline is being retailed now in parts of Ontario and Quebec at from a half to one cent below the ceiling.

Still Checking Murder Leads

With the killer of six year old Donnie Goss still at large Calgary police continued to track down the countless "leads" given by citizens.

One man, Ole Roadsen was picked up at Carbon Monday and taken to Calgary for questioning.

Notice

A GENERAL MEETING
Carbon Community Club
Friday Aug. 2nd.

Scout Hall 8:30 P. M.

Election Of New Officers

Everybody Is Urged To Turn Out

Snorting with power on their first run after leaving the builder's stalls these five new CPR Pacific type engines are the first of 20 which will see service soon in Western Canada. Their work is cut out for them helping move a record tourist engine frames, upon which the boilers are bolted and to which the wheels and other running gear are attached, are flame-cut from rolled steel slabs, a war-time improved technique, used extensively in tank construction.

The New Ration Books

IT WAS ANNOUNCED recently that in September, the sixth ration book will be distributed in Canada. There was a time when it appeared that ration book number five would be the last one to be issued, and that by the time the coupons in it had been exhausted, conditions would be such that rationing would no longer be necessary. On the contrary the world food situation is now more serious than it was at any time during the war, and the necessity for the continuation of rationing here is apparent to everyone. We also know that under our present system we are infinitely better off than the people of Britain, Europe and the Orient; and in many Canadian homes today there is voluntary rationing of foods which can be shipped abroad.

Should Be Ready To Co-operate

In announcing the decision to issue new ration books, Mr. Donald Gordon, chairman of the Wartime Prices and Trade Board, said: "Continued rationing in Canada is this country's answer to a world crying for help. As long as human beings in so many countries of the world are starving or near starvation, it is unthinkable that Canadians should refuse to do their share in helping out." There will be few who disagree with Mr. Gordon in this respect. As yet, Canada has been untouched by any real food shortage, such as has been experienced in other countries. There are many who believe that before the current world food crisis is over, this continent will be more seriously affected than it has yet been. Whatever the situation may be in the future, there is no doubt but that we are at present fortunate in comparison with the people in other parts of the world, and we should be more than willing to co-operate readily in whatever measure of rationing the authorities consider to be necessary.

Many Volunteer Workers Needed

Distribution of the new ration books will commence on September 9th, and will be issued through the six hundred local ration boards situated across Canada. As in the past, thousands of volunteer workers will be needed to assist in the task of distribution, and an appeal has been issued to all those who are in a position to help, to offer their services as early as possible. Consumers have been asked to keep in mind that much of the responsibility for receiving the new books lies with them, since the books must be called for at the local distributing centre. It has also been pointed out that while books are to be issued throughout the week of September 9th, all local distribution points will not be open continuously during that time, and it is the responsibility of the consumer to find out at what times the centre in his locality is to be open. For their own convenience, and in the interest of saving the local ration boards time and trouble, citizens should make every effort to co-operate fully in securing their new ration books promptly.

LEARN HAIRDRESSING

Clean, steady, interesting, refined, good paying profession. Hundreds of positions now open. Many start own shops. Train under direct supervision of outstanding beauty culture experts. Complete, thorough, superior training. The Nu-Fashion method assures success. Write or Call—
NU-FASHION BEAUTY SCHOOL

Vehicle Tests

Are To Be Made In Area Around Churchill

OTTAWA.—The Canadian Army is conducting a series of tests of service vehicles in the area around Churchill, Man., this summer, it was announced here.

A brief statement said: "Vehicle trials are being carried out during the summer of 1946 at Churchill, to test the suitability of various service vehicles for the type of terrain found in this area."

A spokesman said the trials would last through the summer, but at present no plans had been made to make Churchill starting point for last winter's Musk Ox expedition into the Arctic, a permanent testing ground.

Louis XIV had 413 beds. Some were decorated with pearls, silver and gold.

Price Control And Rationing Information

Q.—What happens to the meat coupons and tokens which are turned in to the Local Ration Boards and voluntary collecting organizations for the supplying of meat to starving people overseas?

A.—All meat tokens and coupons are turned in to the Local Ration Boards by the voluntary organizations and these are counted at regular intervals. The Meat Board then knows exactly how much extra meat will be available for export. Through the coupon collection system, up to the end of May Canadians made 325,000 additional pounds of canned meat available for shipment to the hungry.

Q.—Instead of turning in meat coupons and tokens which will not be needed for a family's own use, would it not be just as well to destroy these coupons at home rather than send them to the Local Ration Board or to some voluntary collecting organization?

A.—If you destroyed these tokens and coupons in your own home, the Meat Board would have no way of checking on how much meat was being used by you. For every valid meat coupon and token you turn in the authorities know definitely that that much less meat will be needed to meet the ration.

Q.—How many canning sugar coupons are allowed us this year?

A.—Ten coupons have been validated for the purchase of canning sugar, each coupon being good for one pound of sugar. On May 2 the first five coupons were declared valid and on July 4 the remaining five were validated. The coupons used for the purchase of this sugar are the sugar-preserves, and, if canning sugar is not required, the coupons may be used for the purchase of preserves.

Please send your questions or your request for the pamphlet "Consumers' News" or the Blue Book in which you keep track of your ceiling prices, mentioning the name of this paper to the nearest Wartime Prices and Trade Board office in your province.

Thanks Canada

Viscountess Alexander Grateful For Help Given During The War

Large supplies of oranges and milk, large newspapers and envelopes which were used only once are details of Canadian life which impress anyone arriving from Britain, Viscountess Alexander said.

Speaking to the Ottawa Women's Canadian Club, the Governor-General's wife told her hearers of her children's excitement at the thought of coming to Canada and their delight with the trip.

"They have made themselves completely at home, so much so they have needed some firm handling," she said.

"It was my husband's and my idea that we should keep our children out of school until next September, until they became accustomed to their new home. But I wasn't here 10 days when I knew ours was not a wise decision, and in a few more days I sent them off to school."

Lady Alexander thanked the women of Canada for their help to Britain during the war. The Red Cross had helped to finance 100 war nurseries, the Junior Red Cross had sent comforts, the Imperial Order, Daughters of the Empire had sent clothing, the Kinsmen Club milk, and the Queen's Canadian Fund kitchen utensils and household goods.

Bees seldom visit red flowers because these insects are blind to red.

Canada Is Second Country In The World To Have Uranium Pile

Canada is the second country in the world to have a moderator-stabilized uranium pile, Dr. L. G. Cook of the Atomic Energy Division, National Research Foundation, revealed in a pamphlet being published for the annual conference of the Chemical Institute of Canada.

The pamphlet discloses for the first time some of the facts of Canadian atomic research and predicts Canadian scientists will be among the first to experiment with radioactive elements, to develop special medical treatments and to unravel scientific and medical mysteries.

Sixteen-year-old Isobel Dudgeon, charming Dobbington, Ont., miss, winner of the beauty contest held at the Bruce County Federation of Agriculture's picnic at Walkerton, proudly wears her diadem.

Veteran Students

Prove Outstanding For Their Academic Ability

To further substantiate the efforts being made by veteran students in schools throughout Canada the district office in Edmonton recently received the following letter from N. N. Bentley, Principal, Vermilion School of Agriculture:

"I would like to take this opportunity to advise you that the veterans in attendance at this school have been outstanding for their academic ability, as well as for their participation in athletic, social and literary activities conducted under the Students Union."

How to Combat RHEUMATIC PAIN

Rheumatic pains may often be caused by excess uric acid, a blood impurity that should be extracted by the kidneys. If kidneys fail, and excess uric acid remains, it may cause severe discomfort and pain. Treat rheumatic pains by keeping your kidneys in good condition. Get and use Dodd's Kidney Pills. Dodd's help your kidneys get rid of trouble-making poisons and excess acids—help you feel better. See what Dodd's can do for you. 137

CHINESE INGENUITY

More than 3,000 years ago the Chinese were making protective coatings with various materials; lacquer was long a Chinese specialty, it is claimed.

Both China and India are credited with the origin of puppet shows.

For Reducing Diets

Youth Problem In Germany Appears To Be Aggravated By Lack Of A Proper Plan

(By Robert Keyserlingk)

FRANKFORT-AM-MAIN.—No nation in history, maybe with the exception of Carthage, has ever been so thoroughly beaten as Germany. No nation's youth today presents such a danger to the peace of the world as Germany's. That is as paradoxical as the methods applied to eradicate Nazism from Germany. As a nation, Germany today no longer exists but as a people they threaten to affect the lives of millions not only in Europe but in North America.

"If the people on the other side of the Atlantic are too engrossed with domestic affairs to follow the events here they are not only missing the biggest story in their lifetime, but will be shocked back into fierce reality which is in the making for them right here," a young American captain who had to cope with the baffling problem for months as military governor of a district told me.

The complete lack of a plan for Germany has imposed an impossible task of improvisation on the administrator, who with the best of intentions was in the majority of cases neither aware of what he was stepping into nor sufficiently familiar with the psychological intricacies of Europe to realize the effect of many actions.

Aside from the ever present need for food and for the most essential necessities of even a semblance of civilized life for the people, the greatest problem seems to be German youth. Until about a year ago they were probably the most rigidly organized youth anywhere. They profoundly mistrust, the same as older Germans, any party organization. As one German put it when I asked whether he now belonged to any party:

"Not me. I managed to escape joining the Nazi party because I worked in my father's small business, so I did not need to."

"But the parties now in Germany are all permitted by the Allies. They are safe for you to join," I retorted, suggesting that all men tend to be interested in politics.

"Look here," my German interlocutor said, "how do I know that the parties permitted today won't be outlawed tomorrow, and then where do I stand. I remember when the Allies recognized the Nazi state, received Nazi ambassadors and dealt with them. They were also all right once upon a time and today those who were members are outlawed. How do I know what the leaders of a party which is all right today might do tomorrow—and then you would come back at me? No, I'll vote in a secret ballot when I am pretty sure it will remain my secret."

"Few young men take an active interest in politics. All societies, and in the Third Reich most were 'Gleichgeschaltet' which means Nazi-fied, have been suppressed. The only groups that have kept themselves clear of Nazi influence have been the Protestant church organizations of the confessional movement, and they were mostly driven underground by Hitler and hence led a semi-catacomb existence with only handfuls of members among the young, and Catholic organizations which right up to the end the Nazis did not dare to touch.

This life has now been seriously curtailed by the military government. As one senior American official put it, the hopeless situation into which a number of administrators got themselves has been due to the complete lack of experience of junior officers who suddenly find themselves confronted with and wielding the most tremendous authority.

This official cited two cases to illustrate how anti-Nazi forces have not been fully utilized, but often alienated. The official statement of the Fulda conference, the Catholic hierarchy of Germany, had to be submitted to an American censor. It was turned back to 75-year-old Cardinal Faulhaber by a 24-year-old captain with the injunction to change this and that. The man who had fought the Nazis for years and who still notes the place where the bullets lodged behind him in his office, fired at his palace by a Nazi mob told this official: "Am I a school boy to have my theme sent back to me, with the mistakes crossed out in red pencil?" The cardinal refused. The letter was then published unchanged in the British zone and circulated by hand throughout the American zone, but the feeling created was bad.

The American official has a letter in his possession written to a German bishop by a young captain, refusing some request, which ends up, "The sooner you learn to do exactly what we say the better; or you and your underlings will be placed in confinement." The young captain has since been removed but the fact is known and spreads. Such stories can only

spread in a country which has no real news to read or hear.

All parish activities outside the parish walls have been prohibited "but rosaries and communions are not sufficient for the formation of the young," while all picnics, sports and group activities are banned "as the beginning of militarism," another official, who is himself an educator, explained.

The youth of the country are standing aside and watching. They cannot take up a profession because there is no work available as yet until an economic plan has been settled upon. They have a lot of time on their hands and they can observe the soldiers of occupation engaging in a lusty and flourishing black market barter from cigarettes to more extensive transactions, only some of which have found echoes in courts martial. Only if one realizes that the U.S. soldiers' remittances of pay home equal and formerly exceeded the full pay drawn by the soldiers, and at the same time sees the lavishness of some of the spending, one can realize the extent of the black market operations of the occupying army. And the youth of Germany stand by and watch. Sometimes they engage actively and help.

Whatever ideas they are receiving from their observations both as far as administration is concerned—which in some cases out-Nazis the Nazis for sheer dictatorial approach—or the black market or other unsavory aspects of planlessness among the administrators, they are not those of the ideals the western democracies would want them to have to replace the indoctrinations of Hitler.

Despite hunger and even possible starvation there will still be many millions left, enough to swing the balance of Europe, and of the world.

"You cannot blame us here," I was told by one military official in Munich. "It is you people at home who have lost interest in our work. If the people in North America could only be made to realize that on the success or failure of our work depends their future peace."

"That they will have to live in a world which right here in Germany is building up enough political dynamite to blow the lid off seems temporarily forgotten by them, they still talk about what we will do to the Germans when they should be worried what the people here will do to us and our world if we fail to organize them and somebody else will get them. We are successfully policing their bodies, but what forces will finally win their minds if we fail?"

Russia is to build 140 new light-houses and 16 radio beacons and radar stations on Arctic Sea routes as part of a plan to convert the Arctic into a smooth shipping route within the next five years.

Wiltshire Mansion

A Rambling Old House With Many Windows

In the Wiltshire mansion of Longleat, a rambling house with as many windows as there are days in the year, there died Thomas Henry Thynne, fifth Marquis of Bath.

For 50 of his 83 years, the marquis was lord of Longleat, which his ancestor Sir Thomas Thynne (pronounced Thin) inherited in the 17th century.

To him came the modest honors of the squire — chairmanship of the county council, the Lord Lieutenancy of Somerset.

He served for two spells in Parliament as Conservative M.P.

But, with the Liberal Government of Campbell-Bannerman in power, the marquis retired to Longleat.

There, on his 70th birthday, he lit a huge bonfire, which the folk of four counties could see.

There was free beer at the village inn, country dancing on Longleat's lawns. It was as if the years had not been, and Queen Bess was on the throne, as she was when Longleat was built.—London Express.

Garden Variety

7226

by Alice Brooks

Wish your pillow cases, scarfs or towels were prettier? It's easy to make your wish come true with this flower embroidery in gay hues.

Simple stitching, this is varied enough to be interesting. Wears so well, too! Pattern 7226 has transfer of 6 motifs 3 1/2 x 12 1/2 inches.

To obtain this pattern send twenty cents in coins (stamps cannot be accepted) to Household Arts Department, Winnipeg Newspaper Union, 175 McDermot Avenue E., Winnipeg, Man. Be sure to write plainly your Name, Address and Pattern Number.

Our newest Needlework Book, 1946 edition, is yours for only Twenty Cents more—104 illustrations of designs for crochet, knitting, toys, home decoration, embroidery, and a Free Pattern for three potholders printed in the book.

Scientists recognize eleven cultivated species or races of wheat.

Fires In Our National Parks Constitute A Heavy Loss And Prevention Must Be Taken

ONE of the chief attractions of Canada's national parks is their forest cover. Fires in the national parks constitute one of the greatest menaces to the enjoyment of these areas. They not only destroy scenic beauty, but may ruin watersheds, destroy wildlife, buildings and other valuable property, and sometimes human life.

Canadians have access to some of the most famous and desirable natural scenic playgrounds in the world. Twenty-six parks, covering more than 29,000 square miles, provide recreation for all. The wealth from these parks during the coming years cannot be calculated. During the last ten years 8,148,239 tourists visited the parks. This figure may be doubled and trebled in the next ten years.

From 1935 to 1944 fires in national parks have caused loss and damage exceeding \$781,000. Over the same period 653 fires burned over 423,574 acres of park lands, destroying 84,971 thousand board feet of timber and 495,632 cords of wood. These figures do not include the cost of pre-suppression or reforestation. The loss in birds and wild game cannot be counted.

Loss by fire is not measured in dollars and cents. When a fire wipes out a forest the destruction has only begun. If the fire has consumed the surface soil it may take generations for nature to rehabilitate this land. On the other hand, if the fire is confined to the forest growth, it would take many years to replace the trees destroyed. The time to replace forest growth depends on the species to be grown, the latitude, altitude, rainfall and nature of the soil. A park without trees is like a playground without children. Remember, fire destroys more game than hunters.

The most prevalent cause of fires is human carelessness. Some 85 per cent. of all fires can be placed in this category. Tobacco smokers account for a great number. Some 15 per cent. of fires are attributed to lightning or natural causes. However, fires should not be assigned to this cause without at least good circumstantial evidence. Other causes of fires in or near the parks are by campers, berry pickers, hunters, fishermen, industrial operations, public works, and incendiarism. Fourteen per cent. of all fires are placed in the unknown category, but usually they too are caused by carelessness.

One might ask how carelessness can be the cause of the majority of fires. During the last 10 years every fire occurring in the national parks has been carefully recorded. The location of fire-stricken areas have been noted on maps. These show that most of the fires were originally started along main highways and roads, indicating that they must have been started by some human agency.

The Dominion Forest Service in attempting to reduce losses by fire, has introduced the most modern technical method of fire weather forecasting. Today, emphasis is placed on pre-suppression measures to reduce fire losses. An index of fire hazard is computed from daily records of rainfall, evaporation, relative humidity and wind velocity by means of special equipment. From data so collected and correlated tables are prepared for the use of a field staff in estimating the forest

fire hazard. Several of the western parks have been equipped for the operation of this system. The degree of fire hazard is categorized as follows: extreme, high, moderate, low and nil.

After data has been supplied that the fire hazard is increasing, the superintendent and fire warden service prepare for emergency. Men and equipment are strategically located to meet the fire danger. Such equipment includes the latest in power pumps, hand pumps, fire hose, ploughs, shovels, first-aid, food and all requisites for successfully fighting fires. The patrol system is used extensively during periods of extreme fire hazards. Lookout towers are so situated throughout the larger parks as to command a wide area and give accurate locations on any fire that may start in the region.

Bearing on a fire are taken by means of the alidade or fire-finder. Bearings obtained from two or more lookout towers furnish the accurate location of a fire. Other equipment used in observation towers include maps, binoculars, and compasses. Telephones or two-way radios link the towers with district headquarters. Such communication is very important in fighting fires. Two-way radio is employed to maintain communications between headquarters and actual fire fighting operations.

Most parks also have a modern telephone system. Contact with district headquarters is always maintained and immediate requirements can be speedily met. With weather bureau, fire-lookout towers, emergency lookouts and patrols working in perfect liaison, the spread of fires is considerably diminished. Aircraft are used only for observation and moving equipment and personnel promptly to large fires.

Canada's national parks are areas of outstanding beauty and interest which have been dedicated to the people of Canada for their enjoyment. Tourists are attracted to these great areas to relax, fish and camp. Burned timber profits no one, while green forests, directly or indirectly, sooner or later, are beneficial to all. Canada's potential tourist trade is estimated at more than \$300,000,000 annually. In order to maintain and increase this trade, Canada's forests must be protected. Fire is their greatest enemy. It is virtually impossible to protect our national playgrounds without the close and constant co-operation of all who frequent them.

Arctic Survey

Specific And Detailed Scientific Knowledge Is Required

TORONTO.—Speaking at the annual dinner of the Chemical Institute of Canada, Dr. A. L. Washburn, director of the Arctic Institute of North America, said specific and detailed scientific knowledge of the Arctic was badly needed for proper evaluation of its world role.

He elaborated with the statement "much has been learned by expeditions during the past 100 years, but many of the expeditions merely touched coastlines, leaving interiors still unknown. This is particularly true of the Canadian Arctic islands."

He explained less than one half of Alaska has been topographically mapped, and less than one per cent. has been surveyed from the air. Parts of the Canadian Arctic have never been seen, much less mapped.

"Soviet Russia not only has weather stations but also general scientific laboratories where many types of research are carried on in addition to meteorology. There are almost no stations of this sort in Arctic North America."

FORGOT ONE THING

A Detroit engineer has designed a car which appears to be about the last word in automotive engineering. Included are: Movable reclining chairs for all but the driver; a back seat that converts into a double bed; a fibre glass plastic body; doors controlled by electric push-buttons; air-operated springs, and an engine placed at the rear. In short, everything but an automatic muzzler for back-seat drivers.—Calgary Albertan.

Samuel Johnson published the first English dictionary in 1755. 2680

FOURTEEN-YEAR-OLD BOY KILLED IN MYSTERY SHOOTING—When his chum was fatally wounded in the mystery shooting at a Chatham, Ont., swimming hole, and fell into the water from a tree, Herbert Morgan ignored the danger and dived in to pull him ashore. He points to the spot. One bullet bounced off the tree.

Sawfly Traps

The use of trap strips of early seeded grain around wheat fields is helpful in controlling the wheat stem sawfly. However the value of these traps is largely lost unless proper and timely disposition is made of the trap.

Sawfly egg-laying should be pretty well over by the middle of July. The trap should be checked and if sawdust is found in the stems it proves that the eggs have been laid and hatched and that the resulting grubs are active. The grain in the trap strips should be mown for hay or cultivated down when the egg laying season is over. The cutting or cultivation is just as important as seeding the strips. If grubs are allowed to mature in the trap by leaving the grain stand until fall a heavy infestation is built up for next year.

By cutting down the grain in the trap strips all sawfly grubs in the stems are destroyed. Definite dates for cutting the traps cannot be given but each person can watch his own strip and cut them when he is satisfied that there are no more eggs being laid. Timely disposal of the trap is a very important part of the control program and this is

the time of the year when special attention should be given to this matter.

Brood Sow Policy

Farmers requiring breeding gilts or sows can save money by getting together and arranging purchase under the Brood Sow Policy. In this way they can not only obtain a minimum of 20 sows at cost price with shipping charges prepaid but the Dominion government will provide a purebred Yorkshire boar with each group of 20 sows purchased. These sows will be selected from top quality commercial herds unless an order is especially placed for pure bred sows.

The Brood Sow Policy is operated by the Dominion Production Service with the Live Stock Branch of the Alberta Department of Agriculture co-operating. Full information may be obtained from district agriculturists, the Live Stock Branch of the Alberta Department of Agriculture or from N. Curtis, Dominion Production Service, Edmonton.

Man's desires mould his destiny.

Life lived just to satisfy your self never satisfies anybody.

Summer Resting the Laying Quarters

Too few farmers in Alberta give sufficient attention to the laying quarters. Many poultry flocks are badly infested with lice and poultry premises with mites. In many cases there are other diseases such as paralysis and tuberculosis to contend with.

C.W. Traves, poultry commissioner, says that where a flock of pullets is being reared to replace the hens it is advisable to dispose of all the old birds not later than the end of July. This is especially true if the laying premises have not received a summer rest for some years. All movable equipment such as nests, feed hoppers etc. should be removed from the house, thoroughly scrubbed and disinfected and left out in the sun. The house should be thoroughly cleaned, scraped and the floor scrubbed, following which all the house including walls, ceiling drop boards and all non-movable material should be sprayed with a good disinfectant solution. All windows should be removed and the house left open to the sunlight and air, and under no circumstances should stock of any kind be allowed to enter the house.

If there has been any trouble from disease or parasites, the ground all around the laying house should be thoroughly raked. Do not plow or dig. Cultivate lightly every ten days or two weeks. Remember that any disease or parasites that affect poultry cannot stand sunlight or fresh air.

About a week before the pullets or forced moulted hens are to be put back into the laying house give the house another spraying with a disinfectant solution. Allow to dry, then thoroughly whitewash. Whitewash the nests, hoppers, etc., when returning them to the house. A little disinfectant in the whitewash is desirable. When the house is thoroughly dry, place a good bed of litter on the floor and in the nests the day before the birds are to be put in. The morning that they are to be put in put mash in one hopper, good quality whole oats in another, fill grit and shell box and water troughs and the house is ready for the birds.

Keep the laying birds confined to the laying house.

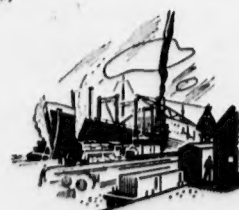

Fast Freight!

You've heard those thundering wheels... seen that stabbing headlight... as you've watched a long train of Canadian Pacific freight cars rumble through the night.

They are hauling more—much more—than just overnight freight. To children and grown-ups in destitute Europe and Asia, those turning wheels are bringing new hope... perhaps life itself.

To all of us they are bringing food, coal, building materials, household furnishings, lumber, paper, machinery—all the thousand-and-one items which make up a nation's domestic and export trade. And they are doing it efficiently and cheaply... every day and night in the year!

OUR HALF ACRE

By J. G. UMBRITE,

Field Supervisor
M. D. of Kneehill
Crop Rotation and
Weed Control

In contrast to the continuous growing of a single crop on the same land, overcropping of the land without plan or design, the rotation of crops has many advantages.

A study of the soil types is generally recognized as an important factor in determining what crops should (or should not) be grown.

By use of proper rotations and suitable crops the liability of serious soil erosion is materially lessened.

In its essentials a good crop rotation utilizes crops that are adapted to local conditions and fit into a farming system that is planned as a business undertaking. Methods should be employed that improve yields, increase soil fertility and control weeds and soil erosion.

It generally pays a farmer better to have several important products rather than only one. "Mixed farming" provides against total failure and distributes the income over the year.

The growing of legumes and grasses in the cropping system is widely recognized as essential in the long term maintenance of fertility.

Rotation of crops when accompanied by care in the use of clean seed is the most effective means yet devised of keeping the farm free (or reasonably free) of weeds.

No other method of weed control, mechanical or chemical, is so profitable, or so easily practiced as a well planned rotation.

Not all weeds can be controlled by crop rotation and not all one crop farms are weedy—yet. But weed problems are likely to be much less severe on farms where crop rotation is practiced.

Noxious weeds (apart from the four bad weeds: Field Bindweed, leafy spurge, hoary cress and Russian Knapweed) should not be a serious problem on the well organized mixed farm, and that goes for wild oats also.

No one can get the best of you unless you let them play upon your worst.

Watch the Summerfallow

Don't take on more summerfallow than you can handle. The chief reason in the past for failure to control weeds by summer fallow was that farmers took on more than they could cultivate properly during the harvest rush. The summerfallow was cultivated thoroughly until harvest and neglected for the rest of the season. Time and money expended in care of the fallow were wasted as far as control of perennial weeds was concerned.

If you are not sure that you can handle all the summerfallow you are planning at present put in a little greenfeed. If you find next fall that you have not been able to eradicate the perennials on your fallow or if you are fighting wild oats, mustard or tartary buckwheat, give fall rye a chance to clean up the land for you.

Crop Report

One again and for the fifth week in succession there has been an improvement in the amount of moisture available to the growth of the prairie crops.

The total moisture condition now stands at 89 percent of normal compared with 88 percent last week and 87 percent at this time a year ago.

For Alberta the moisture condition is now 90 percent of normal compared with 90 percent last week and 79 percent a year ago.

Ration Book Distribution

Local Ration Boards in Alberta have been preparing for the distribution of Ration Book No. 6 during the week of September 9 to 16. Organizational meetings have been held by all local ration boards according to reports reaching the Prices Board.

Local ration boards are enlisting the aid of volunteer workers for the distribution campaign as the same system which was used in former campaigns will be used for the 1946 distribution.

The great burden of the task of distributing approximately 12,000,000 ration books will fall on Canada's local ration boards and their volunteer supporters. The volunteer services of many citizens have in the past played an important part in the successful operation of rationing in the war years.

Local ration boards will decide during August on the dates for the distribution of the books in their communities. The complete week of September 9-16 has been set aside as ration book distribution week but each local ration board will decide on the days during this week when the books are to be distributed in their territories.

Citizens will be advised through the medium of the press of the distribution date in their own locality. Citizens should arrange to get their new books during their local distribution in order to co-operate with the volunteer workers in their community.

Drumheller Strike Off

It wasn't exactly a strike. It was more like a foul ball. But anyway it's practically settled now. The Hotel and Restaurant Employees Union have agreed to withdraw its pickets from two Drumheller hotels and a coffee shop.

The union wanted a contract with the establishments. The hotels and coffee shop objected. No strike was called but union pickets were placed around the premises. One of the hotels had to close.

But at a meeting between the union and the management general agreement was reached on two clauses and on these both parties agreed that the way Calgary got over these two difficulties should be learned but not necessarily copied. When a copy of the Calgary contract is received the union and the management will get together again.

A practical farmer from Cambridge, England is currently addressing Canadian farmers through the BBC's Overseas Service. He is Denis Bullard, prominent member of his county war agricultural committee, whose talks on English farming topics are a frequent feature of the noon farm broadcasts presented regionally by the CBI.

Farmers Benefit From Tourist Trade

Farmers and other primary producers are bound to benefit from tourist trade, bringing in new cash business, it is pointed out by officials of the Alberta Motor Association.

Already this year the benefits of an increased consumer demand is being felt in rural districts and this will increase in later years as hard surfaced roads bring in more tourists.

That is why the AMA has called for a full program of improving main, secondary and market roads in the province. This means as much to the farm producer as anyone else.

The farmer has butter, eggs, vegetables, fruit, meat and other commodities to sell and the tourist is a cash customer eager to buy.

Good roads mean that these producers can get goods to market when they are needed and when they will bring good prices.

That is why the farmer is interested in good market and secondary roads and that is why it all ties in with a general road improvement policy.

Did our boys die hard deaths that we might live soft lives?

WORLD HAPPENINGS
BRIEFLY TOLD

A British firm now is manufacturing the first radar navigation set to be used by the merchant navy.

Polish authorities have re-started operations at what was once one of the largest paper mills in Europe.

The 7,500-ton Canadian Challenger, the first cargo ship to be built in the Quebec area since the end of the war, was launched recently.

A prices board statement attributed the shirt shortage to a world wide scarcity of fabric and the necessity of keeping up Canada's export trade.

The Moscow radio said that sapper squads had completed the de-mining of all invaded Soviet territory, neutralizing 70,000,000 mines, shels and bombs.

Appointment of Russel K. Smith, a native of Regina, as assistant director of the pricing and distribution division of War Assets Corporation has been announced.

The population of Vienna, which reached a low point of 1,323,000 at the end of the war, has climbed back to 1,618,000, a census of the city's 26 districts disclosed.

Fishermen who come to Gosford, Australia, about 50 miles north of Sydney report a black market in fishing worms with prices as high as 35 cents for three worms.

Agriculture Minister Tom Williams said that 200,000 German prisoners-of-war would be used to help harvest Britain's crops this year and added that "substantial numbers of prisoners will again be available in 1947."

The Kaiser's Visit

School Was In Disgrace When They Started His Horse

I do remember one feu de joie in my extreme youth which might have had the happiest results and changed the history of the world.

The visiting celebrity was no less than the Kaiser. We were not allowed to fire blank, lest the Kaiser's horse might be startled. So the ragged clicking of hammers went on until suddenly the very earth seemed to be shaken by one solitary round of blank. People were aghast. So was the Kaiser's charger. It careered with him violently round the field, bucking and kicking, while an agitated staff could do nothing but leave him and his horse to their devices.

The Kaiser stood this tornado very well. But no man could have been so angered as he was when he had finally subdued the horse. He at once changed horses and rode straight off the field. The school was in disgrace. If high authority could have laid hands on the wretched boy who had done this, either by accident or design, he would most certainly have been expelled. But I need not say that his identity is, so far as I know, shrouded in mystery to this very day.

But supposing that the Kaiser had been thrown, as he looked like being several times, and supposing he had broken his neck—what then? Perhaps no World War No. 1, and perhaps thereby no World War No. 2.—The Navy (London).

Executed As Spy

Man Who Lost His Life In Japan For Assisting British Forces

VANCOUVER.—The British passenger freighter the Empire Gunfleet, docked here recently from Hong Kong, bringing with it the personal effects of T. C. (Mysterious) Monahan, executed by the Japanese for assisting British intelligence officers during the war.

Monahan was a Canadian Pacific Railway agent in Hong Kong when the city fell. It was there he received the nickname "Mysterious".

He escaped internment by conquering Japanese armies by establishing his citizenship as a member of the Irish Free State. He received comparative freedom of the city, and organized a food smuggling system into internment camps. At the risk of his life, he assisted British intelligence forces by informing them of Japanese movements.

Monahan escaped detection only for a short time. Then a leak occurred in his system and he was captured and executed as a spy.

His personal effects were forwarded to his widow in New York.

TAKING ENGLISH COURSE

Swedish teachers will take an English language course at King's college, Newcastle, this summer. Arranged by the Swedish Institute and the British Council, the course will comprise conversation and lectures on British arts, political and social life.

NAVY VISITS ALASKA—Visitors to the model Indian village near Ketchikan in Alaska, two members of the University naval training division, Bob Lobsinger and Don Maxwell, met papooses.

Far-Reaching Effect

Lack Of Baling Wire Means Less Feed For Livestock

The Wall Street Journal reports that manufacturers in the United States have been cutting down seriously on the production of baling wire. The price ceilings have made it unprofitable for the steel mills. Lack of baling wire means lack of hay; lack of hay means less feed for livestock, and that in turn means thinner meat animals for slaughter.

It all goes to show what a complex organism modern society has become. And it reveals the same old story, for want of a nail, the shoe was lost, for want of a shoe the horse was lost, and for want of a horse a rider was lost.

No farmer can bale his hay with shoe string!

There are 170 known copies of John Wycliffe's handwritten Bibles.

To Feel Right — Eat Right

Street Renamed

Greeks Show Their Appreciation For Assistance From Canada

Lycabettus street, prominent thoroughfare in Athens, was renamed Mackenzie King street in a ceremony July 1, 79th anniversary of the confederation of Canada.

The municipal council of Athens said the street was renamed "in recognition of the gratitude of the Greek people to the Canadian Prime Minister and the Canadian people for the moral and material assistance which has been repeatedly extended to this country."

EIRE MAY RATION BREAD

A growing public belief that Eire may soon ration bread was reinforced by Commerce Minister John Demass, who told the dail that "the emergency is only beginning. It may be necessary not only to ration bread, but to extend the scheme to commodities not now affected."

Life Savings

Not So Easy Now To Live On The Low Interest Rates

Until a few years ago scores of thousands of Canadians could contemplate secure retirement on life savings of \$10,000 to \$20,000. A farmer could sell his farm, or a small merchant his store, invest the proceeds at 6% and this income plus that from what he had already saved would allow him to live in comfort the rest of his days. He can't do that now and with interest rates still declining he will be in greater difficulties tomorrow. Twenty thousand dollars invested in good securities gave a man an income of about \$100 per month before the war. To get the same income now requires an investment of \$40,000. In the meantime those planning retirement face a double squeeze. The tremendous increase in income tax makes it more difficult to accumulate savings and the sharp rise in the cost of living makes a greater income from those savings necessary. — Financial Post (Toronto).

THE SAFEST PLACE

After depositing \$100 (\$450) in a bank in Natal, a Zululand native recently withdrew the money because he feared for its safety. Reassured when the money was promptly handed to him, he immediately deposited it again.

Governor For Malta

The Newly Appointed Governor Was Born In Canada

Mr. Francis Campbell Ross Douglas, M.P., the newly-appointed Governor and Commander-in-Chief of Malta in succession to Lieut.-General Sir Edmond C. A. Schreiber, K.C.B., D.S.O., was born in Canada in 1889 and was educated at Glasgow University. He has been a member of parliament for North Battersea since 1940. He served as Parliamentary Private Secretary to the Parliamentary Secretary, Ministry of Education from 1940 to 1945 and has since been serving as Parliamentary Private Secretary to the Home Secretary. He has served as a member of the Railway Assessment Authority, the Anglo-Scottish Railway Assessment Authority and the Public Works Loan Board and also as chairman of the Finance Committee of the London County Council. He is chairman of the House of Commons Select Committee on the Estimates. The acceptance of this post will entail Mr. Douglas' resignation of his seat in the House of Commons.

MADE IN CANADA

OUR COMPLETE SHORT STORY— CRAZY FOR MONEY

By ERNEST MILES

Copyright
Wheeler Newspaper Syndicate

BACK for the "Crazy For Money" program, Bud Watson was on the platform waiting to go on the air.

If you listened to the show two weeks ago you will remember Mart Ringley, the Master of Ceremonies, introduced Bud. He told how Bud had just been discharged from the Army and had volunteered for any stunt asked of him. But was to go out to Roscoe's Mammoth Carnival in the Fair Grounds, and to act as a speller on Captain Billy's Bathing Beauties.

Captain Billy Swanson was there to take him out and as a prize Mart gave Bud half of a \$100 bill, telling him to return in two weeks and relate his experiences, promising him the other half of the bill if he made good.

And now the program was on the air and Mart Ringley was saying, "Hello! Hello! Hello! Tonight we are going to hear what happened to Bud Watson, who two weeks ago went out to the Carnival to be a speller on Captain Billy's Bathing Beauties show. Captain Billy is here, too, and I see he has brought a very pretty blonde with him. We'll start with you, Captain. But first, who is this lovely girl?"

"Oh, this is my daughter, Dora, who got herself involved in the stunt so I brought her along, too."

This sounds mysterious, but tell us first what you did with Bud."

"Well, I told Bud to stand by the ticket booth and watch me do a couple of ballyhoos. That's how my daughter, got mixed up in it, for Dora was selling tickets and Bud paid a whole lot more attention to her than to me."

"There was a big crowd of folks who had heard your broadcast and had come out to hear the fun. They began calling for Bud so I brought him onto the platform. That big, red-headed six-footer just stood there tongue-tied. However, I managed to get him going and he did pretty well so I sent him inside to announce the events. The crowd swarmed in after him. We did a whole lot of business and Bud got better all the time."

"Then you would say Bud was a success and deserves the money?"

"He did all right but he was still paying more attention to my daughter than to the show. It ended up by my having him thrown into the tank of water."

The audience was screaming as Mart asked, "You mean to say the evening ended with Bud in the water?"

"Oh, not that night, it was three nights later that happened."

"What in the world has three nights later got to do with it? We'd better get Bud to straighten this out. Bud, tell us what happened."

Bud stammered a bit, "Well, as the Captain told you, we went out to the show and I was to listen and

learn from him what to do. But that girl in the ticket booth set my head in a swirl and I just couldn't concentrate on what the Captain was saying. She was very cool with me and told me to run along and attend to my own business. Then Captain Billy called me onto the platform and there I was in front of that crowd, standing with six girls wrapped in dressing gowns. Gee, I couldn't say a word."

"The crowd laughed at me and Captain Billy said, 'get going, kid,' so I did the best I could."

"But," asked Mart, "how in the world did you get thrown into the tank three nights later?"

"Oh, I was crazy about the girl in the booth and went back each night determined to make her like me. I hung around but she wouldn't talk. Captain Billy got madder and madder and tried to chase me away. On the third night he had a couple of fellows throw me into the tank."

"Keep going, Bud," said Mart, while the crowd roared, "you really got yourself all wet, didn't you?"

"I was certainly wet and just as I got out of the tank Dora came back with the cash and tickets. When she saw what had happened she let out a yell and chased those fellows out. Then she turned and gave Captain Billy a tongue-lashing. I didn't know until then she was his daughter."

"She seems to have begun to take an interest in you at last. What did she do then?"

"Dora sent me back into one of the dressing rooms to dry out."

"Now you're dry again," said Mart, as the audience applauded, "or is that the end of the story?"

"Oh, there's lots more of it because the Captain was still hostile, but I got along fine with Dora and I kept going every night. She told me she had liked me right from the start but thought maybe I was just another flirt."

"Ha, ha, romance seems to have bloomed," said Mart and "let's hear what Captain Billy has to say."

"I didn't like it at first because Dora is only 18 and I've been both father and mother to her. Her mother died when she was three. But Bud is a persistent guy. I could see Dora had fallen hard for him. Bud was just out of the army and had no idea as to what he was going

to do. I couldn't figure any future on that basis, but Dora straightened it out."

"She got him a job so he'd be able to marry her?"

"She certainly did. Bud is now my chief assistant and doing a swell job. When the season is finished they plan to get married and I'll still have my daughter plus a darn fine son."

By now the audience was standing, cheering. Mart finally broke in: "It just goes to show you never know what will happen on this show. Bud, here is the other half of that \$100 bill. Good luck to both of you."

"Thank you very much, it has been a wonderful experience," said Bud and passed the bill over to Dora.

"There," said Mart, "It's the woman who wins. Tell us, Dora, what are you going to do with that money?"

"Well, Mr. Ringley, Bud promised it to me towards the finest trousseau a girl ever had, but Bud is the best prize of all, a real Valentine, and we're going to be very happy."

"I'm sure you will be," said Mart, "and Bud may have been crazy for money but he certainly is wise in his choice of a wife."

Farm Research

Agricultural Groups See The Need For Further Information

An increased demand for the services of agricultural economists was forecast by Dr. J. F. Booth, head of the Dominion Agricultural Department's Economics Division in an address to the 17th annual meeting of the Canadian Agricultural Economics Society at Macdonald College, Ste. Anne de Bellevue.

The Economics Division must provide information useful to farmers, those marketing agricultural products and governments dealing with the farmers' industry, Dr. Booth said.

Since establishment of the division in 1929, much of the initial work had been to build up factual information on problems faced by the individual farmer. During the war, much of the research had been curtailed, but the division had helped in developing and administering numerous farm policies.

Practically every type of activity carried on before the war was represented in requests made to the division by agricultural groups throughout the country for additional research work.

GALLANT ALLIES

Nearly 6,300 awards have so far been made to the Indian Army for gallantry and meritorious services during the war. Awards include 21 Victoria Crosses, four George Crosses, 252 Distinguished Service Orders, 347 Indian Orders of Merit and 1,311 Military Crosses.

Outstandingly Good

"SALADA" TEA

"Yes, yes, of course I'm glad to see you—who's your cute friend with the crisp, crunchy, delicious Grape-Nuts Flakes?"

"Ha! Ha! Ha! I fooled you Jim! That's our new cook. She won't serve anything but malty-rich, sweet-as-a-nut Post's Grape-Nuts Flakes for breakfast."

"Well what are we waiting for? Let's get home quick and dig into that giant economy package."

"And don't forget that Grape-Nuts Flakes are made of two grains—wheat and malted barley. They give you carbohydrates for energy, proteins for muscle, phosphorus for teeth and bones, iron for the blood, and other food essentials. They taste wonderful. They're good for you. They're easy to digest."

SELECTED

RECIPES

BAKING HINTS

Before starting to mix a cake, read the recipe carefully, be sure that all the ingredients are at hand, and that the process of putting them together is thoroughly understood.

Use only the best materials. Good quality shortening (butter gives a better flavor) and using a pure high strength baking powder that assures baking success.

Use fine or castor sugar, coarse sugar does not blend well with other ingredients, if the supply of sugar is limited, a good plan is to sift it, and use the coarse particles for general sweetening fruit, pies, etc.

Measure all ingredients carefully, use the correct method of mixing, and bake as directed. Grease tins with lard, not butter. Pre-heat your oven using top and bottom heat, but when your cake is put in to cook turn off the top element for baking.

Cakes put in the oven at too low a temperature, cause excessive steaming and makes them heavy.

BUTTER BUDS

2½ cups pastry flour
1 cup brown sugar
2 teaspoons Melrose vanilla
1 cup butter or shortening
2 well beaten eggs
¼ teaspoon salt
1 teaspoon Melrose baking powder

Method—Cream butter, add sugar gradually, then the well beaten eggs. Sift 2 cups of flour with baking powder and salt, combine the mixtures, and add flavoring. This should now be the texture of dough, add the remaining ½ cup of flour if necessary. Roll into small balls marking each one with a floured fork. Bake in a 350 to 375 oven for from 10 to 12 minutes. This makes 12 dozen butter buds and are delicious.

POSITION WANTED

The sergeant was trying to train an awkward squad of recruits.

"Shun! About turn!" he roared. Then, as he viewed the hopeless mix-up, he went on: "As you were!"

Most of the men shuffled into the last position, but Private Jones stood still, looking vacantly ahead.

"You!" snapped the sergeant. "I said 'As you were!'"

"I 'eard, sarge," replied Jones, unhappily, "but 'ow were I?"

Liberty Cap, the cone of an extinct hot spring in Yellowstone Park, is 3,200 years old. Its age has been determined through the minute quantities of radium it contains. 2680

The Great Loss From Fires Has Been Stressed

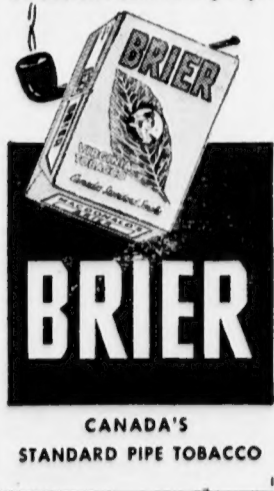

The current slogans urging Canadian manufacturers to export should carry a warning that export is conditional upon conservation of natural resources. Garfield Weston, well-known industrialist said in a message to the Canadian Forestry Association.

"More than \$300,000,000 of annual exports from Canada derive from the pulp and paper mills. This is greater than our sales of gold or wheat. The pulp and paper industry stands first in total wages paid and in capital invested."

"About 6,000 of our people find means to incinerate 400,000,000 cubic feet of the national wood supply every 12 months. Export stops on lands that fire passes over. And a gap of 50 to 100 years may ensue before the burned district comes to life again."

The Chinese used rockets in 1232 to repulse the herds of Kublai Khan.

THE WORLD OF WHEAT

By H. G. L. STRANGE

The Dominion Entomological Laboratory at Lethbridge forecasts that considerable damage from cutworms can be expected during the 1947 season. To lessen this damage the laboratory recommends that all work on summerfallowed fields cease about July 31st, that all weeds should be killed by that date and that such fields should be left undisturbed by any implement throughout August and the first half of September when the cutworm moths will be laying their eggs, for the reason that cutworm moths will not lay their eggs on fields that are free from weeds and that are encrusted by rains.

It is, of course, necessary also to prevent animals from walking on such summerfallowed fields after July 31 for the cutworms will lay their eggs in spots where the crust has been broken by hoofs of animals.

This is all a simple and effective method of reducing cutworm damage next year a method which I tried myself for many years, which I observed farmers using with good results and which I can strongly recommend to all farmers. This method of control works and works well.

WEDDINGS

KILLEN — GREEN

St. Ann's Church was the setting of a wedding on July 23, when Agnes, only daughter of Mr. and Mrs. J.A. Green became the bride of Malachi Killen, son of the late Mr. and Mrs. James Killen of Ennisville, Ont. Rev. J. Killen of Rockyford, brother of the groom, performed the nuptial mass at 8 a.m.

The bride entered the church with her father and wore a blue taffeta gown fashioned with a bouffant skirt, fitted bodice and sweetheart neckline. A blue lace cap held her veil.

Miss Patricia Blanchford was bridesmaid and N. M. Schmaltz of Beiseker attended the groom. Guests were ushered by Cyril Holloway.

Miss Betty Fitzgerald and Miss Theresa Cush sang during the mass and the signing of the register.

A wedding breakfast followed at the Palliser hotel where the bride's parents assisted the bridal party in receiving guests. Father E. Doyle proposed the toast to the bride.

Mr. and Mrs. Killen left for Waterton Lakes. For travelling the bride donned a two-toned wool suit of black and gold with accessories of black. They will make their home in Beiseker.

People who hold back do not stand out.
